- * Outstanding creativity
- * Individual style
- * Good communication skill
- * Quick learning
- * User experience
- * Deep knowledge of Internet technology
- * Strong web typography
- * W3C experience

Professional experience:

Szabolcs Bakos

Web 2.0 designer

Internet sites:

HUNGARIAN ROADS PUBLIC COMPANY

The Hungarian Roads Public Company is one of the ten biggest state-owned companies in Hungary. My task was to plan and make an (Sharepoint 2007 compatible) internet design for this giant. Beside the design I developed the masterpages of the portal as well.

KONZOL.HU

My task was to make an interactive splash screen for a brand selling exclusively console games. My next task is going to be the design of an online shop.

B13 BLOG

I designed and put this blog service up together with my team in 2005. It has a built-in blog editor and consists of roughly 15 skins. The portal is updated regularly.

SZOLNOK UNIVERSITY

I had to develop a design and an interface compatible with a Sharepoint 2007 based portal. Beside the design I developed the masterpages of the portal as well.

CLUB MIAMI

Club Miami is the most popular disco club of Eastern Hungary. I was requested to make changes to the design of its webpage. The owner wanted to have an image with darker colours instead of the former, lighter one.

T-CABLE

I had to make some modifications to the portal of the second biggest broadcast transfer service provider company in Hungary. Beside the changes to the main page, I had to design the page presenting new services, and the graphic newsletters as well.

GABONET

Gabonet is a new marketing system which allows for the trade of commodities deposited in the warehouse. On the basis of the existing logo, I had to change the design to be used on the portal, and I was entrusted with the planning of the interface for the commercial site as well.

Detailed references

Check out my extended portfolio with images and urls at my weblog:

Non-public references

My intranet works are not for the public. Should you enquire about me please send me a request email to: info@newconcept.hu and I send a private account for you to check my extended intranet references at my weblog.

Professional experience:

Szabolcs Bakos

Web 2.0 designer

Internet sites:

ADATPARK / DATAPLEX

I was to develop a new corporate portal for Adatpark and Dataplex (powered by T-Com) which provide standard and premium services. The two companies wished to have a common portal with minimal alterations in colour and structure. Beside the design, I also built the portal based on Sense/Net Portal Engine.

HUNGARIAN FINANCIAL SUPERVISORY AUTHORITY - LCL

I had to develop the new online design of a site which was created to present the new opportunities of bank credits combined with life insurance.

MARKETLINE

I had to develop a new modern portal instead of the old, out-of-date site for Marketline, the business Solutions Department of T-Online Co. My task was to design the new web logo and develop the portal with Sense/Net Portal Engine.

ITD HUNGARY

At Sense/Net I was requested to build a new portal and intranet for the Hungarian Investment and Development Agency, as well as with the development of the new design and the interface.

TIGÁZ INTERNET PORTAL

Tigaz Zrt. provides natural gas supply and services for public utilities in the north eastern region of Hungary. My task was to plan the new corporate portal of the company. The new design was meant to suggest nature and harmony.

NATIONAL BANK OF HUNGARY - VISITOR CENTRE

I had to develop the new design of the visitor centre, one of the micro sites of the portal, using the already existing elements. The design was meant to be juvenile and modern.

Non-public references

My intranet works are not for the public. Should you enquire about me please send me a request email to: info@newconcept.hu and I send a private account for you to check my extended intranet references at my weblog.

Professional experience:

Szabolcs Bakos

Web 2.0 designer

Internet sites/portals:

ARKAD CONFECTIONARY

I had to develop the online design of one of the most exclusive confectionaries of Eastern Hungary. The owner asked me for a clear, light design.

DESIGN PROJECT

I completed the flash based photoshop tutorial site for my own pleasure. Unfortunately, I had to close it three years later because of lack of time.

Intranet portals:

HUNGARIAN PRIME MINISTER'S OFFICE INTRANET PORTAL

I had to develop the intranet design and the interfaces. As the intranet consist of three parts, I completed three design plans with similar structures but various designs.

ITD HUNGARY INTRANET

I had to design a new intranet for the Hungarian Investment and Trade Development Agency. My tasks were to design the interface and the new identity.

TIGÁZ INTRANET

The Tigaz Zrt. provides natural gas supply and services of public utilities in the north eastern region of Hungary. I was charged with the new design of the intranet. I had to develop a new web identity and develop the interface.

HUNGARIAN ROADS PUBLIC COMPANY INTRANET

The Hungarian Roads Public Company is one of the ten biggest state-owned companies in Hungary. My task was to plan and make an (Sharepoint 2007 compatible) Intranet design for this giant. Besides the design I developed the masterpages of the portal as well.

THE HUNGARIAN NATIONAL COUNCIL OF JUSTICE INTRANET

My task was to plan the new intranet portal of the National Council of Justice. Also I built the intranet portal based on Sense/Net Portal Engine.
